CONTROL

Redview Speed Governor RT1001.

Ranked among Kenya's top-rated speed governors, the Redview RT1001 enforces speed limits with precision, preset at 80km/h. Fully approved by NTSA, KEBS, and CMTE, it includes a free GPS tracking application, historical playback capabilities, and real-time speed violation alerts. Backed by an extended 1-year manufacturer's warranty for added reliability.

SAFETY

Redview GPS Tracking

Monitor your fleet in real time with accurate GPS tracking, geofencing, and historical playback of up to one year. Access via Android/iOS, backed by powerful fleet management software and detailed reporting for operational intelligence and oversight.

Redview GPS Tracking

- Real Time GPS precise monitoring
- Historical Playbacks of upto 1 year
- Geofencing
- Android and iOS mobile apps
- Fleet management software
- Comprehensive reporting.

ACCURACY

Redview Fuel monitoring solution.

Powered by advanced Russian engineering, our system delivers 99.5% fuel data accuracy. Monitor refueling and fuel draining in real time, with comprehensive analytics and detailed consumption reports. Access insights easily via user-friendly mobile and web applications—ensuring total control and transparency over your fuel operations..

Redview Fuel monitoring

AI ASSISTANCE

Driver Assistance Camera ADAS & DMS camera

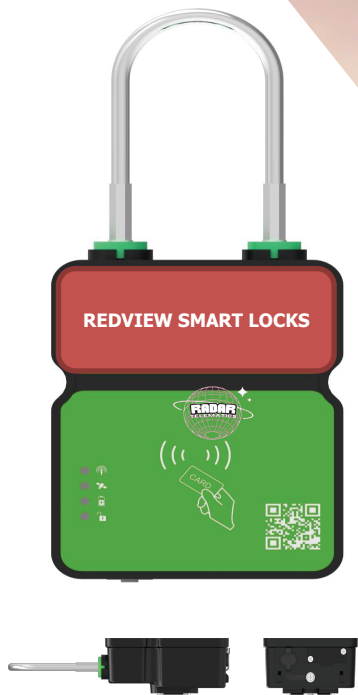

Our AI-powered ADAS and DBMS camera detects lane departures, near collisions, driver distraction (phone use, smoking, fatigue), and road sign violations. Real-time alerts, multimedia evidence, RFID-based driver ID, GPS tracking, and integrated fleet management software ensure full visibility, accountability, and compliance across your operations.

Driver Assistance Camera

lane deviations	•
Near collisions	•
Phone use	•
smoking	•
fatigue driving	•
Road signs recognition	•
Real time alerts on violations	•
Multimedia reporting for evidence.	•
RFID for driver management.	•
GPS tracking and Fleet management software.	•

SEAL IT

Redview Smart locks

Secure your assets with advanced smart locking technology. Redview Smart Locks offer real-time access control, remote locking and unlocking, tamper alerts, and detailed entry logs. Seamlessly integrated with mobile and web platforms, our solution ensures enhanced security, traceability, and operational efficiency for businesses and fleets.

Model

Name	HB-A1Ms
------	---------

Unlocking mode

RFID	RFID sensing distance 2.5cm
Bluetooth	Bluetooth 4.0 BLE, Communication distance 20m

Power

Main battery	2950 mAh Li-Ion battery 3.7 V (10.9 Wh)
Charging Voltage	5V DC@2A
Charging Time	3 hours
Standby time (10 minutes per data)	3 months

Physical specification

Dimensions	124 x 95 x 47 mm (L x W x H)
Chain length	300mm
Weight	494 g
Shell material	Flame retardant PC
Lock rod seal resistance	1000Kg

Operating environment

Operating temperature	-30 °C to +70 °C
Storage temperature	-40 °C to +85 °C
Battery charge temperature	-0 °C to +45 °C
Operating humidity	5% to 95% non-condensing
Ingress Protection Rating	IP67

Certification & Approvals

Regulatory	CE, RoHS, WEEE

VISION

Vehicle Dash Cameras

Our dual HD camera features uninterrupted high-definition recording, advanced night vision, a built-in G-sensor, WDR technology, and GSM module connectivity. It also comes with a mobile application which gives you access to real-time remote monitoring and loop recording functionality therefore ensuring continuous surveillance, incident accountability and overall operational efficiency.

Vehicle Dash Cameras

- capture all incidents as you drive in HD
- Night vision Dual dash Cameras
- 1080HD resolution recording cameras
- built in G-sensor, WDR and GSM module
- supports Loop recording
- Real time remote monitoring via mobile application

PROTECTION

Intelligent Car Alarm Systems

Our advanced Car Alarm System is built to provide intelligent, seamless security while enhancing convenience and control.

Whether you're parked in town, on the move, or miles away, our alarm system keeps your car secure and connected.

CAR ALARM SYSTEM

- | | |
|---|---|
| Anti-Hijacking Central Locking System | • |
| Remote lock and unlock doors and boot | • |
| Warning for incorrectly closed doors | • |
| Automatic locks doors when driving | • |
| Adjustable Vibration sensor. | • |
| Reduce wear and tear on your original car key fob | • |
| 2 key fobs. | • |
| | |
| | |

SECURE

Anti-Theft Smart Immobilizer

Car Lock Systems delivers next-generation anti-theft protection with a smart immobilizer that automatically cuts off your engine when the RFID key fob is out of range. No buttons, no exposed wiring – just seamless, hands-free security for any vehicle. Stylish key fobs included

CAR LOCK SYSTEM

- | | |
|--|---|
| No physical buttons installed on the vehicle | • |
| Automatically detect RFID key fobs within 3 meters | • |
| activate the car and deactivate when the distance is greater than 3 meters | • |
| No unnecessary wiring | • |
| Stylish keyfob | • |
| . | • |

MODERN SOLUTIONS

At Radar Telematics, innovation drives everything we do. We help our clients streamline operations and efficiently manage their fleets, assets, and data through intelligent, technology-driven solutions.

Our strategy is built on three core principles:

- Leveraging smart technology to develop modern, scalable solutions
- Continual innovation to meet evolving client needs
- Regular product updates to stay ahead of market trends and industry challenges
- We don't just offer tools — we deliver clarity, control, and confidence to power smarter business decisions.
